Reviews of the **Angleplay Blocks: Simple Half-Rectangle Triangles, 84 No-Math Quilt Blocks, Easy-to-Follow Charts** *by* Margaret J. Miller

Goltikree

I like how this book breaks out the individual blocks but it does not have much for projects, just some photos of other people's finished quilt which are difficult to interpret. A good starter book but

a beginner/intermediate quilter (I am the latter) will definitely need more than just this one book.

The Sphinx of Driz

Since there is no book description to-date, I guess I'll be the one to tell you: This book is a companion to the template set by the same name. The template set is NOT included but can be ordered (from the author) for \$60, plus another \$20 if you want a holder for them. The book relies on your buying the templates. It gives tracings of each in the back, so you could make your own, but as most quilters know, there is a big difference between homemade sheet-plastic templates and laser-cut plexi-templates, both in accuracy and safety. Just be aware: an additional purchase is almost certainly required with this book!! I wish they'd said that up front, and I'd have passed on this one.

love the book

PC-rider

This is just what I needed to help build up my quilting template collection. Good price even with the shipping.

Whitebinder

I couldn't hardly wait for this book to come. Christmas present from my Secret Santa. It's everything I was hoping for. Great information, lots of wonderful ideas and pictures, and thorough instructions. A good book for all quilters. Shipper was one of the best. Used book was NEW.

Oreavi

I love those angles. Want to see them in my quilt soon.

Pedora

Took her class, hooked on her methods, and using her templates/rulers the book is a huge help!!!

Fun, Fun Fun

Pedora

Took her class, hooked on her methods, and using her templates/rulers the book is a huge help!!!

Fun, Fun Fun

Loved the way these quilts work out. It really isn't difficult to make the templates yourself, if you're used to making templates. Accuracy is just a matter of measure, check, and recheck!
